

Wolf Willow Community Traffic Calming Measures

Safe Mobility Public Engagement

Adaptable safety measures are being explored for installation this summer to address the safety concerns along Wolf Willow Crescent. Neighbourhood residents have the opportunity to share their insights on the proposed solutions to help inform next steps.

What We have Heard and Proposed Safety Measures

The City of Edmonton has heard concerns from Wolf Willow residents regarding an increase in traffic volume, speeding and parking congestion.

The City has developed a plan for safety measures to be installed to improve street safety along Wolf Willow Crescent.

- Speed humps at 4 locations to encourage safe speeds
- Curb extensions adjacent to two crosswalks to reduce the crossing distance and draw drivers' attention to the crossing
- No parking zones will be implemented adjacent to one crosswalk to improve driver sightlines towards the crosswalk

Virtual Information Session

A virtual information session for Wolf Willow residents will be held on May 9 from 6-7 PM to address the Wolf Willow Resident-only Parking Program, summarize traffic concerns and review proposed solutions. Please register at engaged.edmonton.ca/WolfWillowInstallations.

Share Your Perspective: Public Engagement Opportunity

Residents may complete an online survey from May 2 to May 16 at engaged.edmonton.ca/WolfWillowInstallations.

Next Steps

What We Heard Report: After engagement activities end, City staff will create a What We Heard report to share learnings through the Engaged Edmonton website.

Timeline: Installation of proposed traffic calming solutions could begin as early as June 2023

Contact: Please direct any questions or comments to saferoads@edmonton.ca, and we will be in touch!
