

Wolf Willow Traffic Calming Measures Installation

The City has developed various installation options, both adaptable and permanent, to help address concerns about speeding and crosswalk safety along Wolf Willow Crescent.

Community Traffic Safety Concerns: What We Heard

The City conducted public engagement from May 2-16, 2023 to provide residents with the opportunity to share their insights on the proposed solutions to help inform next steps. Thank you to those who took the time to share their insights and experiences with us.

A What We Heard report is now available on engaged.edmonton.ca/wolfwillowinstallations.

Traffic Calming Measures Installation Plan

Pending weather or unforeseen staff resource issues, the installation is scheduled for between June 13-20, and will take approximately two-three days once it has begun. If the installation is delayed for any reason, it will be installed as quickly as possible after the above dates. Any updates to the installation timeline will be posted on engaged.edmonton.ca/wolfwillowinstallations. While traffic flow on Wolf Willow Crescent will be maintained during the installation, please expect impact to on-street parking, noise, construction equipment and workers in the area.

Installation and Location	Benefit
Adaptable curb extensions will be installed adjacent to two crosswalks on Wolf Willow Crescent.	Curb extensions reduce the crossing distance and draw drivers' attention to the crossing. The curb extensions will be approximately the size of two parked cars!
Speed humps will be installed at three locations along Wolf Willow Crescent and one location along Wolf Willow Road.	Speed humps help slow vehicle speeds, reduces risk of a serious crash and increases safety for people walking, driving and rolling.
No parking zones will be implemented adjacent to one crosswalk on Wolf Willow Crescent.	No parking around crosswalks improves sightlines and visibility, enhancing crosswalk safety.
Wayfinding signage at various locations throughout Wolf Willow and parking information signs will be installed along northern portions of Wolf Willow Road.	Educate visitors on alternate access points to the river valley trails system and preferred public parking locations to help reduce parking-related congestion currently experienced in the southeast portion of the neighbourhood.
