

Encouraging Safe Speeds in Ramsay Heights Asphalt Speed Humps Installation

Following the two year rubber speed hump pilot and recent public engagement, the City is moving forward with the installation of ten asphalt speed humps in the Ramsay Heights neighbourhood.

Speed Hump Locations: Based on feedback from residents, ten locations have been identified for the asphalt speed hump installation, as outlined on the map on the back of this notice.

- Speed humps 1 to 8 will be converted to asphalt speed humps in their current locations.
- Location of speed hump 9 is adjusted slightly based on the feedback and insights shared by residents living along 42 Avenue, moving from south of the intersection to north of the intersection to address traffic shortcutting concerns.
- A new speed hump (10) will be installed on Ramsay Road just north of Ramsay Crescent based on resident feedback.
- We heard concerns associated with parking and waste cart placement near speed hump 2, which is due to the concrete blocks that are on either side of the current rubber speed hump. However, these concrete blocks will be removed as the asphalt speed hump will go curb to curb. Therefore, the speed hump can be installed in its current location.

Timelines: Installation of the asphalt speed humps and removal of the rubber speed humps is scheduled for June 10 and 11.
