Belgravia Traffic Review

How Feedback Will Be Used

Public input will be considered, along with technical, budget and policy requirements, to further narrow down potential options to improve traffic flow and reduce shortcutting.

Next Steps

Proposed improvement measures will be presented to City Council later in 2026.

Please note: further direction and funding from City Council would be required to advance implementation of any future improvement measures.

About the Project

This project was initiated as a result of a Council motion made on April 8, 2025 (see item 10.2), which directed the City to complete a traffic review of the neighbourhood and identify potential short- and long-term interventions to address concerns about traffic congestion and shortcutting in the neighbourhood.
